

Jit Gohill, MD, PhD, FRCSC
Medical and Surgical Diseases of the Eye

Arun Lakra, MD, FRCSC
Eye Physician and Laser Surgeon

***Next time please **CALL** our office to make referral appointments.

Patient name: _____

With: DR. GOHILL DR. LAKRA

Appointment Date: _____

Appointment Time: _____

Please notify your patient with the above appointment and the following important information before attending our clinic:

- Appointment time may extend up to 3 hours long including dilation, testing, and wait time. For first time visits, it is recommended to have someone drive the patient to and from the clinic and to have the patient bring a pair of sunglasses. Dilation may last 4-8 hours long and will make vision blurry and eyes will be sensitive to light.
- At the patient's first appointment, it is necessary to bring their Alberta Health Care card and a list of current medications, including eye drops. Diabetic patients should bring food and their medication due to the length of the appointment.
- For contact lens users, patients should **NOT** wear these lenses for at least 12 hours before all appointments.
- Our clinic does **NOT** offer eye testing for refractions, therefore a prescription for glasses or contacts will not be given.
- Not all services are covered under Alberta Health Care and patients may be required to pay privately.
- While we will endeavor to send out our courtesy call to remind patients of upcoming appointments, please be aware of our **NO SHOW** policy. Failure to provide our office with 24 hour notice of a cancellation will result in a \$50.00 **NO SHOW** fee. Our office could use this scheduled time appropriately for other patients.

Thank you for your kind referral.
